## Build a business around your green idea

The future is green. To get there we need massive amounts of green ideas. Ideas that are put into action, so they will reach massive amounts of people.

Starting a business is the most powerful way to put ideas into action. A business can grow based on customer needs. And it can grow on a global scale. That is key to tackling climate change.

Join us. We're here to get you started. So you can massively contribute to tackling climate change.

## Train. Compete. Launch.

Your idea can be a mind shift in urban mobility, a revolution in the food chain. A breakthrough in energy production or efficiency. A radical rethink of waste management or any other idea that helps fix climate change.

Even if your idea is still on the back of a napkin, you're welcome to join. Jump on this rousing ride on your way to global impact.
